Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS • "I want a simple way to log my daily workouts without ads or paywalls." • "Can an app tell me what to do based on dumbbells I have at home?" • "I want to know if I'm burning enough calories to hit my targets."	THINKS • "Is my workout routine scientifically balanced, or am I overtraining?" • "I don't want to spend hundreds of dollars on personal trainers." • "I want my fitness data secure, private, and accessible via API."
PERSONA NAME <i>(Fitness Enthusiast / Web & Mobile API Consumer)</i>	
DOES • Works out 3 to 5 times per week (Cardio, Strength, HIIT). • Logs exercises, duration, sets, reps, and calories in REST client. • Queries Gemini AI for custom routines whenever travel disrupts gym schedule.	FEELS • Motivated and empowered when seeing weekly streaks and consistency. • Anxious and overwhelmed when routines stagnate or cause fatigue. • Confident having scientific AI feedback tailored to their fitness goals.
