Customer Journey Map: End-to-End Fitness Experience

Map the end-to-end experience of your target user across the platform touchpoints, capturing actions, emotional state, technical channels, and system outcomes.

Journey Stage	User Action	Touchpoint & Channel	User Thought / Emotion	Process Ownership	Improvement Opportunity
1. Discovery & Onboarding	Registers account and enters fitness level, age, weight, goals	POST /api/auth/register (Web/Mobile UI)	"Excited to get started with an AI-driven fitness tracker"	authController.js / User Schema	Auto-populate recommended initial goals based on BMI/BMR
2. Authentication	Logs into account and receives cryptographically signed JWT token	POST /api/auth/login (JWT Bearer)	"Feels secure; fast sub-35ms authentication response"	authMiddleware.js / bcryptjs	Implement refresh tokens and biometric auth support
3. Workout Execution & Logging	Performs workout and submits type, duration, calories burned, date	POST /api/workouts (RESTful CRUD)	"Satisfied seeing session saved cleanly in cloud database"	workoutController.js / MongoDB	Auto-calculate calories burned using MET formulas if omitted
4. Seeking AI Guidance	Requests personalized workout plan specifying equipment and duration	POST /api/ai/workout-recommendation	"Empowered; gets instant customized exercises with sets and reps"	aiController.js / Gemini 1.5	Provide difficulty toggle (Beginner, Intermediate, Advanced)
5. Reviewing Analytics	Queries AI fitness insights to evaluate weekly consistency and streaks	POST /api/ai/fitness-insights	"Motivated seeing habit milestones and actionable recovery tips"	aiController.js / MongoDB Query	Generate weekly automated summary push notifications
